

MAKE YOUR OWN NATURE CRAFT BILBY

To create your own nature craft bilby, use a large gumnut for the body, a sheoak pod for the head, and attach hakea pods for ears. A coral gum cap makes a perfect pointy nose, and piece of string can be used for a tail. No hakea pods? No problem! You could use small leaves, pistachio shells or anything else that's about the right size and shape. Glue everything together with a trusty low-melt glue gun.
